What were the Fund costs for the last year? *(based on a hypothetical \$10,000 investment)*

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class A	\$107	0.94%

How did the Fund perform last year and what affected its performance?

For the fiscal year ended October 31, 2024, the Fund returned 27.03%, reflecting performance at the net asset value (NAV) of Class A shares, compared to the 24.33% of a securities market index with investment characteristics similar to those of the Fund, the MSCI ACWI Ex USA Index with Net Dividends. The Fund's broad-based securities market index, the MSCI EAFE Net Index, returned 22.97% over the same period.

Positive factors for the markets included momentum around the soft-landing narrative, which was supported by signs of a cooling labor market and a slowing economy, leading the market to adjust its expectations of future interest rate cuts by global central banks. In Europe, gross domestic product notched its sixth consecutive positive reading, expanding by 0.2% in the second quarter. Additionally, the European Central Bank lowered interest rates by 25 basis points in June, September, and October, in line with expectations. Against this backdrop, global equity markets delivered strong returns.

Top contributors to performance: Security selection within the Industrials sector contributed to relative performance, led by an overweight allocation to Hitachi, Ltd. Security selection within the Information Technology sector also contributed to relative performance, led by an overweight allocation NVIDIA Corp.

Top detractors from performance: Security selection within the Financials sector detracted from relative performance, led by an overweight allocation to Grupo Financiero Banorte SAB de CV. Security selection within the Consumer Staples sector also detracted from relative performance, led by an overweight allocation to L'Oreal S.A.
