

END NOTES TO PERFORMANCE

The Global Investment Performance Standards (GIPS®) compliant performance results shown represent the investment performance record for the Lord, Abbett & Co. LLC (Lord Abbett) **Short Duration Core Institutional Composite**. This composite is comprised of all fully discretionary portfolios managed on behalf of institutional investors investing primarily in various types of short duration debt (or fixed income) securities and derivative instruments that are intended to provide economic exposure to such securities. The portfolios may invest in individual securities of any maturity or duration, but the portfolios will normally maintain an average dollar-weighted duration range between one and three years. The portfolios will invest substantially all assets in securities rated investment grade or deemed by Lord Abbett to be equivalent. The portfolios may at times hold below investment grade securities if the securities were eligible at the time of purchase and subsequently downgraded. Effective January 2018, accounts funded on or before the 15th of the month will be included in the Composite effective the first day of the first following month. Accounts funded after the 15th of the month will be included effective on the first day of the second following month. Prior to January 2018, other than registered investment companies sponsored by Lord Abbett, accounts opened/funded on or before the 15th day of the month were included in the Composite effective the first day of the second following month and accounts opened/funded after 15th of the month were included effective on the first day of the third following month. Registered investment companies sponsored by Lord Abbett are included in the Composite in the first full month of management. Closed accounts are removed from the Composite after the last full month in which they were managed in accordance with applicable objectives, guidelines and restrictions. Performance results are expressed in U.S. dollars and reflect reinvestment of any dividends and distributions. The Composite was created in 2017. A complete list of Lord Abbett composites and a description of the investment strategies is available on request. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

For GIPS® purposes, the firm is defined as Lord, Abbett & Co. LLC (“Lord Abbett”). Total Firm Assets are the aggregate fair value of all discretionary and non-discretionary assets for which the Firm has investment management responsibility. Accordingly, Total Firm Assets include, but are not limited to, mutual funds (all classes of shares), privately placed investment funds, non-U.S. domiciled investment funds, separate/institutional portfolios, individual portfolios and separately managed accounts (“Wrap Fee/SMA Portfolios”) managed by Lord Abbett. Total Firm Assets also include any collateralized, structured investment vehicle, such as a collateralized debt obligation or collateralized loan obligation, for which Lord Abbett has been appointed as the collateral manager. For the period prior to January 1, 2000, the definition of the Firm does not include any hedge fund or SMA program accounts where Lord, Abbett & Co. LLC did not have the records so long as it is impossible for Lord, Abbett & Co. LLC to have the records (within the meaning of relevant GIPS® standards interpretations). Total Firm Assets also exclude separately managed program accounts that involve model delivery.

The number of portfolios and total assets in the Composite, and the percentage of total “firm” assets represented by the Composite at the end of each calendar year for which performance information is provided are as follows:

Calendar Year Ended	2018	5/1/2017 - 12/31/2017
# of Portfolios	1	1
Total Assets (\$M)	\$14	\$8
Percentage of Firm Assets	0.01%	0.00%
Total Firm Assets (\$M)	\$161,055	\$156,110
Dispersion	N/A	N/A
Lord Abbett Short Duration Core Institutional Composite Gross (Annual)	2.11%	1.08%
Lord Abbett Short Duration Core Institutional Composite Gross (3 year Annualized Return*)	N/A	N/A
Lord Abbett Short Duration Core Institutional Composite Gross (3 year Annualized Ex-Post Standard Deviation*)	N/A	N/A
Lord Abbett Short Duration Core Institutional Composite Net (Annual)	1.91%	0.95%
Lord Abbett Short Duration Core Institutional Composite Net (3 year Annualized Return*)	N/A	N/A
Bloomberg Barclays 1-3 Year U.S. Government/Credit Index (Annual)	1.60%	0.25%
Bloomberg Barclays 1-3 Year U.S. Government/Credit Index (3 year Annualized Return*)	N/A	N/A
Bloomberg Barclays 1-3 Year U.S. Government/Credit Index (3 year Annualized Ex-Post Standard Deviation*)	N/A	N/A

*N/A for performance periods with less than 3 years of data based on the composite inception date.

END NOTES TO PERFORMANCE

Dispersion is represented by the asset-weighted standard deviation, a measure that explains deviations of portfolio rates of return from the asset-weighted composite return. Only portfolios that have been managed within the Composite style for a full year are included in the asset-weighted standard deviation calculation. The measure may not be meaningful (N/A) for composites consisting of five or fewer portfolios or for periods of less than a full year.

The performance of the Composite is shown net and gross of advisory fees, and reflects the deduction of transaction costs. The deduction of advisory fees and expenses (and the compounding effect thereof over time) will reduce the performance results and, correspondingly, the return to an investor. Net performance of the Composite as presented in the table on the previous page reflects the deduction of a "model" advisory fee, calculated as the highest advisory fee, borne by any account (without giving effect to any performance fee that may be applicable) in the Composite (an annual rate of 0.20% of assets) and other expenses (including trade execution expenses). **For example, if \$10 million were invested and experienced a 10% compounded annual return for 10 years, its ending dollar value, without giving effect to the deduction of the advisory fee, would be \$25,937,425. If an advisory fee of 0.20% of average net assets per year for the 10-year period were deducted, the annual total return would be 9.78% and the ending dollar value would be \$25,469,675. The management fee schedule is as follows: 0.20% on the first \$50 million, 0.15% on the next \$100 million, 0.13% on the next \$350 million and 0.11% on all assets over \$500 million.** Net-of-fee performance reflects the deduction of the highest applicable institutional advisory fee that would be charged to a new institutional client account based on the current fee schedule for this strategy. The composite includes one or more registered investment companies or collective investments sponsored by Lord Abbett ("Lord Abbett Funds") that are subject to fees and expenses that would be inapplicable to an institutional client account. Therefore, the actual performance of Lord Abbett Fund accounts included in the composite may be lower than the net-of-fee composite performance presented. Fees and expenses applicable to the Lord Abbett Funds are disclosed in each Fund's Prospectus, which is available upon request. Past performance does not guarantee future results. Certain securities held in portfolios contained in this composite may have valuations determined using both subjective observable and subjective unobservable inputs. The Firm's valuation hierarchy does not materially differ from the hierarchy in the GIPS Valuation Principles.

Lord Abbett claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Lord, Abbett & Co. LLC has been independently verified for the periods 1993 through 2017. The verification report is available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

The Bloomberg Barclays 1-3 Year U.S. Government/Credit Index is the 1-3 year component of the U.S. Government/Credit index. The Government/Credit Index includes securities in the Government and Credit Indices. The Government Index includes treasuries and agencies. The Credit Index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements. To qualify, bonds must be a U.S. Government or Investment Grade Credit security and have at least \$250 million par amount outstanding. The benchmark has not been examined by Deloitte & Touche LLP.

Past performance is not a reliable indicator or a guarantee of future results. Differences in account size, timing of transactions, and market conditions prevailing at the time of investment may lead to different results among accounts. Differences in the methodology used to calculate performance also might lead to different performance results than those shown. Composite performance is compared to that of an unmanaged index, which does not incur management fees, transaction costs, or other expenses associated with a managed account.
