

SERIES FUND - FUNDAMENTAL EQUITY PORTFOLIO

INVESTMENT OBJECTIVE

The Fund's investment objective is long-term growth of capital and income without excessive fluctuations in market value.

PORTFOLIO CHARACTERISTICS

Number of Holdings: 55

Wtd. Avg. Market Cap (\$B): \$375.6

Price/Earnings Ratio: 22.1x

AVERAGE ANNUAL TOTAL RETURNS (%) AS OF 09/30/2025

CLASS VC SHARES	YTD	1 YEAR	3 YEARS	5 YEARS	10 YEARS	EXPENSE RATIOS	
Net Asset Value (without sales charge)	11.40	11.03	18.83	14.19	10.06	Gross 1.19%	Net ¹ 1.08%

Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time. Returns for less than one year are not annualized.

Returns shown reflect the percentage changes in net asset value (NAV) for Class VC shares and include the reinvestment of distributions and do not reflect sales charges or other expenses of Variable Contracts. If those sales charges and expenses were reflected, returns would be lower. Because the Fund serves as an underlying investment vehicle for Variable Contracts, Fund shares currently are available only to certain insurance company separate accounts at NAV.

CALENDAR YEAR TOTAL RETURNS AT NAV (%)

	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024
NAV	-3.44	15.74	12.57	-8.16	21.51	1.77	27.31	-11.98	14.63	16.65

Reflects the percent change in net asset value (NAV) of Class VC shares and includes the reinvestment of all distributions. Performance is shown for each calendar year.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

A Note about Risk: The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies, including market, liquidity, currency, and political risks. Although the Fund invests a significant portion in large cap company stocks, it also invests in mid cap and small cap company stocks, which tend to be more volatile and may be less liquid than large cap company stocks. Mid and small cap companies typically experience higher risk of failure than large cap companies. However, larger companies may have slower rates of growth than smaller successful companies. Investments in value companies can continue to be undervalued for long periods of time and be more volatile than the stock market in general. These factors can adversely affect Fund performance.

The Fund's portfolio is actively managed and is subject to change.

¹The net expense ratio takes into account contractual fee waivers/expense reimbursements that currently are scheduled to remain in place through 04/30/2026. For periods when fees and expenses were waived and/or reimbursed, the Fund benefited by not bearing such expenses. Without such fee waivers/reimbursements, performance would have been lower.

This is intended for the exclusive use of investment professionals at insurance companies for use in their evaluation of Lord Abbett mutual funds. Not to be used with the general public in oral or written form.

GLOSSARY OF TERMS

Weighted Average Market Capitalization is the average market capitalization of all companies held in the portfolio, with each company weighted according to its percent held in the portfolio.

Price/Earnings Ratio is the weighted average of each holding's P/E ratio (price of a stock divided by its earnings per share).

The Russell 1000® Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. Index is unmanaged, does not reflect the deduction of fees or expenses, and is not available for direct investment.
