AVERAGE ANNUAL TOTAL RETURNS (%) AS OF 09/30/2019

CLASS A SHARES	YTD	1 YEAR	SINCE INCEPTION	EXPENSE RATIOS ¹	
				Gross	Net [†]
Net Asset Value (without sales charge)	13.25	-2.28	-0.73		
Maximum Offering Price (with 5.75% sales charge)	6.71	-7.91	-5.66	12.87%	1.05%

Net Asset Value (NAV) reflects the percent change in NAV of Class A shares and includes the reinvestment of all distributions. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to a contingent deferred sales charge (CDSC). The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

¹Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

²Reflects the average net expenses of Class A shares of all funds within the Lipper Global Multi-Cap Core Fds Category based on Lipper data available.

New Fund Risk: The Fund is newly organized. There can be no assurance that the Fund will reach or maintain a sufficient asset size to effectively implement its investing strategy.

A Note about Risk: The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies and/or sectors in the economy. The foreign securities in which the Fund primarily invests generally pose greater risks than domestic securities, including greater price fluctuations and higher transaction costs. Foreign investments also may be affected by changes in currency rates or currency controls. With respect to certain foreign countries, there is a possibility of nationalization, expropriation or confiscatory taxation, imposition of withholding or other taxes, and political or social instability that could affect investments in those countries. These risks can be greater in the case of emerging country securities. Investments in either growth or value stocks may shift in and out of favor for long periods of time, depending on market and economic conditions. The Fund is subject to the risks associated with derivatives, which may be different from and greater than the risks associated with investing directly in securities and other investments. These factors can affect Fund performance.

The Fund's portfolio is actively managed and is subject to change.

[†]The net expense ratio takes into account contractual fee waivers/expense reimbursements that currently are scheduled to remain in place through 02/29/2020. For periods when fees and expenses were waived and/or reimbursed, the Fund benefited by not bearing such expenses. Without such fee waivers/reimbursements, performance would have been lower.
