CALENDAR YEAR TOTAL RETURNS AT NAV (%)

| | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 |

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to a contingent deferred sales charge (CDSC). The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

¹Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown. Gross Expense Ratio includes Management fees, Distribution and Service (12b-1) fees, Acquired Fund Fees and Expenses, and Other Expenses.

A Note about Risk: The Fund invests in underlying funds that may engage in a variety of investment strategies involving certain risks; the Fund is subject to the particular risks of an underlying fund in proportion to a respective investment. Because the Fund will be more heavily invested in fixed-income funds than equity funds, it will be more affected by interest rate risk, credit risk, liquidity risk, and other risks associated with debt securities. These risks are greater for high yield debt securities. The underlying funds' equity investments are subject to greater risk and market volatility than fixed income investments. Foreign investing, especially in developing countries, carries additional risks, such as currency and market volatility, and political and social instability. The Fund is subject to the risks associated with derivatives, which may be different from and greater than the risks associated with investing directly in securities and other investments. These factors can affect Fund performance.
