Marc O. Pavese, Ph.D.

Partner, Head of Quantitative Research, Analytics & Technology, Investments

Marc Pavese is responsible for overseeing Lord Abbett 's Quantitative Research, Portfolio Analytics, and Technology teams within investments. Working in an integrated way, these teams focus on building, innovating, and maintaining our investments data architecture, our suite of front office tools, our proprietary models, and analytics for portfolio management, risk management, and trading. We deliver both scalability and competitive edge to our investments teams as we seek to manage our clients' assets to outperform. In addition, Mr. Pavese serves on the firm's Operating Committee.

Marc joined Lord Abbett in 2008 and was named Partner in 2014. Prior to his current role, he served as a Quantitative Analyst for the taxable-fixed income team and then in equities. He has been a Portfolio Manager in several of the firms' strategies as well. Prior to Lord Abbett, he was leader of the Investments Quantitative Risk Group at Genworth Financial and Research Scientist at the General Electric R&D Center, where he became a co-inventor on seven granted patents and five additional filed patents pending, 2000-04, in the machine learning and decision technologies space.

He earned a BA in chemistry from Columbia University and a PhD in chemical physics from the University of Pennsylvania.
